

New Vacancy For Dortmund office

tyntec (www.tyntec.com) is a mobile interaction specialist, enabling businesses to integrate mobile telecom services for a wide range of uses – from enterprise mission-critical applications to internet services. The company reduces the complexity involved in accessing the closed and complex telecoms world by providing a high quality, easy-to-integrate and global offering using universal services such as SMS, voice and numbers.

Our constant business growth, reputation for quality and ever-expanding global presence mean entrepreneurial spirit is a highly valued trait amongst our vibrant workforce. With more than 150 people from 40 nations spread across UK, Germany and Singapore and US tyntec has fostered a dynamic, multicultural and energetic team culture. Be part of it!

For our Dortmund office we are looking for an enthusiastic:

Database Developer (f/m)

As a Database Developer you are a talented professional with expertise in databases.

You work as part of the development team and take care of database related aspect. You demonstrate your ability to develop and maintain complete database solutions for a variety of business requirements and challenges.

In this hands-on role you work on our various databases. You keep focused attention to the needs of the systems and their different requirements.

It is your job to direct the course of development by discussing solutions and possible new approaches. You have to communicate effectively and solution oriented with team members, internal customers, management and other business stakeholder. As sharing knowledge is very important to you, you coach colleagues and take responsibility for the design.

Main Responsibilities:

- ◆ Highly collaborate within an agile team consisting of software- and database developers, architects, project manager and business departments to understand business & application needs to develop a holistic solution together
- ◆ Work on multiple projects to provide adequate and proactive support for various business initiatives and applications

- ◆ Offer ideas and options for pragmatic solutions which are in balance with the mid-to-long-term goals of the database domain and the department
- ◆ Key contributor for the design, implementation, testing, deployment, maintenance and tuning of complex database systems with fast turn-around
- ◆ Apply innovation, creativity and pragmatism to database development process and implement process and procedural improvements
- ◆ Model databases and develop tables, stored procedures, views, triggers, and other database objects
- ◆ Provide detailed analysis of problems, database architectural solutions with recommendation
- ◆ Investigate, diagnose and monitor database events and resolve complex database issues
- ◆ Address production issues that involve SQL database performance tuning and replication

The ideal candidate should have the following profile:

- ◆ Expert database developer & designer focusing on SQL
- ◆ In-depth knowledge in the all aspects of SQL databases enable you to make the right technical decisions
- ◆ Committed to provide customer-focused quality service
- ◆ Comfortable taking responsibility for delivering complete solutions, troubleshooting and resolving software system problems independently
- ◆ Capable of expressing yourself in a way your audience understands
- ◆ Taking responsibility for others, helping them and guiding them if necessary
- ◆ Keen interest in learning and applying other database technologies, like NoSQL

This might be helpful:

- ◆ You love to work in an international and exciting environment
- ◆ You are a great table soccer player (or wish to become one)

The package:

- ◆ A professional, international and exciting environment
- ◆ Challenging and diverse projects
- ◆ Excellent career development opportunities
- ◆ Distinctive team spirit
- ◆ A competitive salary

Start of Employment: As soon as possible.

If you are interested in working in an environment where ownership, pragmatism, teamwork and open-mindedness are amongst our core values, then we welcome you to explore the opportunities at tyntec. Please send your CV and cover letter to Hagen Donner (career@tyntec.com).

Please include: "Database Developer" in the title of your email.
